Adjutant-General State of Florida.

REPORT

OF THE

ADJUTANT-GENERAL,

FOR THE

YEARS 1877 AND 1878.

FLORIDA STATE LIBRARY
REPORT OF THE ADJUTANT-GENERAL.

ADJUTANT-GENERAL'S OFFICE, }
TALLAHASSEE, FLORIDA, December 31st, 1879. }

His Excellency, GEORGE F. DREW, Governor and Commander in-Chief:

SIR: I have the honor to submit for your consideration the following report of the condition of the State militia under the act of militia laws August 6th, 1868. The State militia is divided into two divisions and four brigades, and fully organized, as will be shown by the annexed tables:

By your Excellency's approval I have created a 5th brigade, in the 2d division, being important to fully organize all the militia of the State.

Of the 26 independent volunteer companies we have 14 infantry and one cavalry company armed with the improved breech-loading Springfield rifle, and one artillery company with 2 12-pound howitzers and side arms. Several requisitions for arms from other volunteer companies are now on file in this office. We are unable for the present to furnish them. Many of the volunteer companies are nicely uniformed and well drilled.

There being no appropriation made in the past three years for defraying the expenses of the militia, I would respectfully ask that your Excellency recommend that a small appropriation be made for purchase of blank books and report commissions, also copies of military tactics, that each company may have at least one copy.

The roster of officers is appended to this report. (Tables Nos. 1 and 2.) Table No. 3 shows returns of the enrolled militia of each county in the State. Total 25,903.

It will appear by the report of the volunteer and enrolled militia our available force is 27,463.

ORDNANCE.

Tables Nos. 4 and 5 contain a statement of the ordnance owned by the State.

PUBLIC BUILDINGS AND GROUNDS.

I found the Capitol needing many repairs for the protection and use of the building, the porticos being in a very dilapidated condition, the one on the west side having to be made entirely new, and that on the east side repaired. The roof was

found in a leaking condition, and has been partially repaired, the portion covered with tin well painted. Many of the doors and windows have been repaired. All the fire-places were entirely burnt out. They have been well repaired with fire-brick. Lightning-rods all thoroughly repaired. The exterior of the Capitol has been well painted at a cost that should give entire satisfaction. The Senate Chamber is furnished with entire new furniture, excepting carpets and window curtains, which are much needed.

The Assembly Hall has been fixed up as neatly as possible with the old furniture. It is to be hoped that our next Legislature will make appropriations to furnish this Hall with new desks, &c. There are many repairs needed to preserve the building and keep it in good condition.

I would recommend the building of water closets on the basement floor for the accommodation of the Legislature and State officers. The fencing now enclosing the Capitol presents a most neglected appearance, and should be entirely removed, and as iron is very cheap at this time it would be economy to use material that will not only be very durable, but a more desirable and admirable surrounding to a building so conspicuous as our State Capitol. This improvement I specially recommend, and that your Excellency ask that an appropriation be made for this work, to be accomplished as early as practicable.

By recommendation of your Excellency and Cabinet, I had four good lanterns put up, which afford a brilliant light, and give enjoyment to all in passing through the grounds, also being a protection to the building. The cost of the lights is small compared to the advantage derived.

The grounds have been laid out, and a portion adorned with varieties of evergreens, shrubs, and rare flowers, other parts in grasses, making a beautiful lawn.

The exterior of the Capitol being nicely painted, it requires a thorough painting inside. I think \$4,000 would be a very small amount to ask as an appropriation for the improvements needed.

Annexed is a table showing the amount paid out in repairing and furnishing the capitol and grounds:

STATE PRISON.

Biennial Report of the State Prison, Commencing March 4th, 1877, and Ending December 1st, 1878.

You will find by reference to the annexed tables, from No. 1 to 33 inclusive, a partial review of our State Prison, then at Chattahoochee, under the respective administration of Governors Reed and Stearns, from 1869 to December, 1876. They kept the convicts at the State Prison working on the State Farm, and hiring them out to work on railroads and farms, as they deemed best. It will be seen from the best data we have, the expenses each year greatly exceeded the income, as shown in their reports.

Under the act approved March 3d, 1877, authorizing your Excellency to hire or lease the convicts out, for a term of two years or more, the Adjutant-General was directed to advertise and lease them to the best bids for the interest of the State. The lowest bid was by H. A. Wyse and G. A. Chairs—the State to pay them \$5,000 for two years—all expenses to be paid by them, after the convicts should be delivered from time to time.

This bid was accepted, being the best that could be done at the time. A portion of the prisoners were in Sumter and Orange counties, where they had been hired by Adjutant-General Varnum, to work on the St. Johns and Lake Eustis Railroad. The remainder who were in the State Prison, were delivered to G. A. Chairs, and taken to Leon county, where they have been at work on his plantation ever since. Those in Sumter and Orange counties were delivered to H. A. Wyse, and all that have been sentenced since that date to the present have been divided, and delivered to the two contractors. Mr. Wyse allowed the convicts at the St. Johns and Lake Eustis Railroad to remain for three or four months, and they were then removed to Live Oak, where they still remain working on his turpentine farm.

In October last we advertised for bids to December 15th, 1878, to hire them from March 6th, 1879, to January 1st, 1881. The bids received have not been accepted, and the time is extended to January 3d, 1879. Since this report was written a contract has been made with H. A. Wyse, to take the convicts for two years, for the sum of \$200, he paying all expenses of transportation and care of convicts, and relieving the State of all expenses pertaining to them. It requires time and experience

to give confidence to those who would work them, before the State will be able to receive a profit from their labor. I feel confident that a few years' experience will prove that their labor can be made profitable to the State.

I have before me reports of the convict labor of many of the States. Some, where they have public work to be done, building railroads, and working coal and iron mines, make it profitable, while other States do not pay expenses. My opinion is, if well managed, their labor can be made profitable on plantations, or working on railroads. In order to accomplish this they must be well-fed and clothed, lodged in comfortable quarters, good discipline enforced, and a competent, effective guard provided. The majority of them may be worked without shackles; this will make them more cheerful, and enable them to work better. I respectfully recommend that strict attention be observed in carrying out all sanitary regulations, that contractors should be required to employ a good physician to visit them frequently, and in all cases they should provide a suitable hospital, with comfortable bedding and good nurses, never allowing the sick to remain in the same quarters with those who are well; also, to remove their shackles while sick. During the present year, mortality among them has been greater than any former year. Many that were turned over January 1st, 1877, under your Excellency's administration, were in bad health, some suffering from chronic diseases. Of those received since that time, some were sickly and badly diseased—many of them having been confined in close jails in unhealthy localities. I would more specially mention the condition of those turned over to us in Sumter and Orange counties, where they had been working a long time on the St. Johns and Lake Eustis Railroad. They were in a most deplorable condition, but under one of our contractors they soon improved, and by his direction were allowed to remain from March to July, 1877, for the purpose of completing the work on the road.

Swamp or malarial fever broke out in their camp, and though under treatment of two physicians, several died. As soon as reported to me, I had them removed to Live Oak, where medical aid and good care were promptly given, yet several subsequently died. I have the satisfaction to report, that, with a few exceptions, they are now in good health. Under the next contract I shall require safe commodious quarters, with grounds well inclosed with a picket fence, so that on the Sabbath day they may be relieved of their shackles, and under a proper guard take necessary exercise.

I most earnestly ask that some provision be made for their moral and spiritual welfare; that our missionaries be enabled to visit them on the Sabbath day, and by their religious instruc-

tion and prayers, bring them to a saving knowledge of our Lord and Master.

The per cent. of escapes is not as great as when, under the former administration, they were usually kept in the prison walls—still it is greater than it should be.

I would specially recommend that no prisoner be allowed the use of fire-arms, or be employed *as a guard*, as it is very demoralizing for a prisoner to guard prisoners.

In the discharge of my official duties I have endeavored to deal firmly and justly with all. In some instances contractors have not complied with all my requisitions, under an act to provide for the employment of persons convicted of crime, and sentenced to the State Prison, approved March 3rd, 1877. All of which I have reported to your Excellency and Board of State Institutions.

The experience gained in the past year will enable us to work with greater satisfaction, as under the next contract the guard must be such as the Adjutant General will approve.

I would also recommend to your Excellency and Board of Commissioners of State Institutions that the contractors be required to furnish two suits of warm clothing in the fall and winter, and the same in the spring and summer seasons, with two pair of shoes each year. I respectfully ask that I may be allowed to retain from three to four convicts to work at the State Asylum for the insane. I shall select those that are orderly and can be trusted.

Annexed you will find report of Dr. Hankins, physician in charge of convicts under management of H. A. Wyse.

I would respectfully refer you to the several tables of expenses, etc. In some cases, for want of better facilities for transportation, the officers' fees and expenses have been very heavy. Only one road in the State allows any discount on transportation of State convicts, the Atlantic, Gulf & West India Transit Company's, under the administration of the Hon. D. L. Yulee.

By the strict enforcement of the criminal laws under your Excellency's administration, through a judicious selection of the Judiciary of the State, it will be seen that crimes are greatly on the decrease. Such will be our fortunate experience, and progressive condition as a people so long as good government is maintained, and every official in the State will discharge his duty, holding fast the watch-word of Florida, "In God we trust."

STATE ASYLUM FOR THE INSANE.

An act making appropriations for the repairs of buildings at Chattahoochee to be used as an Asylum for the indigent insane, and for the support, care, and treatment of said indigent insane persons, approved March 2nd, 1877:

SECTION 1. Sum of 3,000 dollars is hereby appropriated for the repairs, alterations, and construction of buildings, the construction of yards and enclosures, and the purchase of necessary furniture to be used in connection with the Asylum.

SEC. 2. That the sum of \$7,000 for the year 1877, and the sum of \$7,000 for the year 1878, is hereby appropriated for the maintenance, support, and treatment of the indigent insane of the State, and the sum of \$700, or so much thereof as may be necessary, is appropriated for the transfer of lunatics now in Asylums of other States to this State.

An act to provide for the superintendence and management of the Asylum for the indigent insane, approved March 2nd, 1877 :

SECTION 1. The Adjutant-General shall have supervision of, and immediate superintendence of the Asylum for the indigent insane of the State, subject to the direction of the Board of Commissioners of State Institutions.

On taking charge of the buildings for the Asylum March 6th, 1877, I found much to do before they could be made comfortable for the lunatics. Having been used as a State Prison for 8 or 9 years, they were in a dilapidated condition. Mr. A. J. Fish was employed to repair them. He completed a large portion of the work early in July, having in good order for comfortable occupation one building for white females, one for colored females, and one for the white males—the latter building having been entirely abandoned, with not even a floor, sash, or blinds.

The large building known as the barracks was put in order for the colored males, rooms being made for them on the second floor. I purchased furniture and such supplies as was needed at that time.

The Board of Commissioners then employed a Physician and such employees as was necessary. They then directed me to proceed to the Asylums of Georgia, South Carolina, Maryland and Pennsylvania, and transfer the insane who were supported there by our State to our own Asylum.

I returned about the 16th of July, 1877. This being the first Lunatic Asylum established by the State, we were some time occupied in organizing and securing suitable employees. Our efforts were eventually crowned with success. Our kind and estimable Matron, Mrs. Barnard, was removed by death after serving us for three months with most commendable fidelity. She was sincerely lamented by all in the Institution, having won by her kindness and gentle dignity the respect of the officers, and affectionate confidence of the unfortunate inmates. We have at this time a good corps of employees all working in harmony, and we are doing as well as it is possible with the means at our command. By permission of your Excellency and the Board of Commissioners, I have had the grounds en-

closed to the east of the Females' building, and repaired one of the small brick buildings in this enclosure, and transferred the most violent among the female patients to this more secluded place. The Physician in charge considers this change a very important improvement.

I am having the grounds laid out in walks, and in one year we can make them very attractive, by planting grasses for a lawn, interspersed with evergreens and flowers. By this arrangement the males and females are entirely separated. I have also enclosed with a substantial picket fence grounds for the colored females to the North of the building occupied by them. This separates them from the males. I have enclosed with a neat paling fence the office and residences of officers, so that the inmates may have access to these buildings only at our pleasure.

We will be compelled to have additional room for the colored females, every room being now occupied in their building. To accomplish this we must build an addition to it, or repair our work-shop. It would do well for that purpose if we could spare it, but we cannot conveniently do so.

The white male department is filled, some of the rooms having two patients. I would recommend the great necessity of an appropriation for repairing the main building, known as the barracks when in possession of U. S. troops. This will be decidedly our best building when repaired. It will make some 48 rooms, the building being three stories high and well located. We can then transfer the white males to this department and the colored males to the building vacated by them. To do this and furnish it, would in my judgment cost at least \$5,000. By strict economy this amount might also build the additional rooms, ten or fifteen, now needed for the colored females. The buildings in use are heated by fire-places and stoves; in repairing the large building we can no doubt devise some better means of heating it.

I respectfully refer your Excellency to our Physician's report here annexed, marked "A," reporting number received, discharged, &c., from the opening of our Institution to December 30, 1878.

The State is at present supporting some 49 insane persons at their homes in this State. I respectfully recommend that all patients the State by law provides for should be sent to the Asylum so soon as we have renovated and fitted up for their comfortable accommodation the buildings I have just mentioned. By an act of the Legislature, they draw \$12.50 per month. According to the best information we have they are very destitute persons, living in parts of the State inaccessible to physicians, seldom if ever receiving medical treatment. If

they are to be wards of the State it would certainly be much better for them, and also for the State, that they should be at the Asylum, where they can receive the benefit of a physician, employed for that purpose, and may if under regular treatment have their health of mind and body restored. While left at their homes they receive no such benefit, and the money sent them may in many instances be used for the support of others. With but a few at the Asylum, the expenses may be fully as much as the amount paid them at home. As the number increases at the Asylum, the amount per head decreases. For example, if we had 150 in the Asylum it would not cost the State as much per head as if but 50.

GARDEN FARM.

Our Garden Farm is well cultivated by the labor we have at our command, and we have raised abundance of such vegetables, as we need. The present year we have raised, not less than 300 bushels of Irish, and 500 bushels of Sweet potatoes—other vegetables in proportion. We planted a few acres in forage, which yielded a sufficient supply of Oats to feed our stock for six months, and with additional facilities, we can make the farm very profitable to the Institution.

STATE PROPERTY.

There was no invoice of the State property given me, when I took charge of the Institution. The following is a statement of the property found there:

6 mules, 1 old horse, 1 yoke of oxen.

2 wagons, 4 sets of harness, all badly worn.

1 cart, 1 sugar mill, 3 sugar boilers.

A few plantation implements, consisting of plows, hoes, axes.

2 cross-cut saws, 2 grain-cradles, 1 hay-cutter.

A small lot of carpenter's and blacksmith's tools.

OFFICE FURNITURE.

2 writing desks, 1 pine book case, 1 clock.

Lot of books, having been used for State Prison.

BARRACKS AND HOSPITAL FURNITURE.

A few blankets and old bed-sacks.

1 pair counter and 1 pair platform scales.

3 stoves, 1 cooking stove.

Some medicines of no great value.

PROVISIONS FOUND ON HAND.

370 bushels of corn and 12 barrels of syrup.

I respectfully refer you to report of Dr. W. B. Foreman, Physician in charge of State Asylum for the past six months.

It is with great pleasure, I express my approbation of his fidelity to the trust assigned him, filling his position with an earnestness in the performance of duties, worthy so responsible a charge.

Tables showing expenses of repairs, maintaining and furnishing the Asylum, will be found in "Abstract of Property, and Invoice of Provisions, December 31st, 1878."

ABSTRACT OF PROPERTY, &C., OF THE ASYLUM, DECEMBER 31ST, 1878.

1874 acres of land, with all the Asylum buildings and improvements.

4 mules, 2 wagons, 4 sets harness.

1 cart and harness, 1 buggy wagon and harness.

1 old and 1 new saddle and bridle.

1 wheelbarrow, 1 sugar mill, 3 sugar boilers.

2 sythes and cradles, 1 grass sythe, 1 straw cutter.

3000 bricks, 6 head of cattle, 12 hogs.

Plantation implements, consisting of plows, hoes, axes, 2 cross-cut saws, blacksmith's and carpenter's tools.

OFFICER'S RESIDENCE AND OFFICE FURNITURE.

1 dining room and 1 bed room furnished.

1 cooking stove, with all necessary kitchen furniture.

2 writing desks, 1 pine book case, 1 letter press, 4 chairs, &c.

WHITE FEMALE DEPARTMENT.

21 bed rooms, each furnished as follows:

1 bedstead with bedding, 1 bureau, 1 washstand, pitcher and basin.

1 table, 1 looking-glass, 2 chairs and a good supply of bed-clothing.

Parlor and dining rooms, neatly furnished, laundry and cooking departments, well furnished with cooking stove and all necessary utensils. The halls are lighted by kerosene lamps. We have a convenient bath room, the water conducted from the cistern.

WHITE MALE DEPARTMENT.

Nineteen rooms, each furnished as follows:

1 bedstead and bedding, washstand, pitcher and basin.

1 table, 1 looking-glass, 2 chairs.

A few of the rooms have 2 beds in them.

1 dining room, neatly furnished, and 2 large halls heated by 2 stoves.

COLORED FEMALE DEPARTMENT.

Eight rooms, each furnished as follows:

1 bedstead and bedding, pitcher and basin.

1 dining room furnished, and the building heated by fire-places.

COLORED MALE DEPARTMENT.

Eight rooms, each furnished as follows:

1 bedstead and bedding, pitchers and buckets.

1 dining room furnished, and hall heated by a stove.

APOTHECARY DEPARTMENT.

A good supply of Medicines, with such appointments as are necessary for proper medical treatment.

PROVISIONS IN STORE ROOM.

1200 lbs. Bacon, 200 lbs. corned beef, 6 barrels flour.

2 barrels crackers, 1 barrel sugar 300 lbs., 4 barrels syrup.

1 sack coffee 140 lbs., 12 lbs. tea, 2 sacks salt.

4 bushels meal, 4 bushels grist, 100 bushels corn, 400 bushels potatoes.

1 barrel scuppernong wine, 160 lbs. soap, 1500 seed cane.

CLOTHING.

2 pieces bleached shirting.

3 pieces brown shirting.

2 pieces Georgia cassimere.

4 pieces calico.

24 pairs shoes, 1½ dozen hats.

Spool thread, buttons, etc.

1 sewing machine.

I deem it my duty to call attention to our Christian obligation to these unfortunate objects of our care.

Many of them, in their rational moods, can comprehend the spirit of a religious meeting, as proved by their quiet deportment during the occasional religious services they have engaged in. Some have asked for a piano, books and papers, that they may have a pleasant diversion from painful thoughts, and with such discipline I have no doubt many would be blessed with a restoration of mind. I have conversed on this subject with several ministers, and all express great willingness to officiate whenever their appointments will permit. I earnestly ask that some appropriation be made that will secure to them regular religious services.

In conclusion, I desire to tender your excellency my thanks for your confidence and cordial support in my management of all official duties incumbent on me.

I have the honor to be your obedient servant,

J. J. DICKISON,

Adjutant General, State of Florida.

"A."

To Adjutant General J. J. Dickison, Superintendent of the State Lunatic Asylum.

GENERAL: I have the honor to submit for your consideration the following consolidated report of this institution, from the 2d of March, 1877, the time of opening this asylum for the reception of patients, to December 31, 1878.

Number of white male patients received.....	34
Number of white female patients received.....	24
Number of colored male patients received.....	15
Number of colored female patients received.....	13
Total number received.....	86
Total number discharged.....	19
Total number died.....	12
Total number at present under treatment.....	55

The treatment of this class of patients is unsatisfactory to the attendant physician, and being diseased both in mind and body, the rate of mortality is necessarily large. On taking charge as physician I found every department in excellent order. Under your supervision and management the institution has steadily advanced its standard of excellence. Since enclosing separate grounds for the females, we have little trouble in keeping them from having any communication with the males, which will contribute greatly to the welfare of the institution. The fitting up of separate apartments for the more refractory and noisy inmates is an important point gained in the treatment of the better class of patients. The neat paling fence around the office and the building occupied by the matron, the druggist and the physician, adds greatly to the convenience and the appearance of the premises. The buildings occupied by the white males are full, some of the rooms having two inmates. The building for the colored females is crowded. Not having rooms enough, we have been compelled to put several of the patients in the passage. It is to be hoped that our Legislature will take immediate action toward repairing and enlarging the buildings of this institution. The grounds are thoroughly swept and cleaned every day, the weather permitting, the houses are constantly scoured and cleansed, the water closets are frequently washed out and disinfectants used to correct foul odors, and in fact every effort is made to keep the institution clean and healthy. The patients are warm and comfortably clad, well fed, and well provided for in every way. We have been fortunate in securing kind and attentive attendants, whose time, day and night, is devoted to watchful care over our unfor-

tunate patients. We have to be ever on the alert to prevent serious accidents from fire and other causes. Knowing as I do that the progress this institution has made is due in a great measure to your excellent management and manly efforts in its behalf, I feel confident of your endorsement by a grateful public.

In conclusion, I embrace this opportunity of tendering my sincere thanks for your kind and generous support in my earnest desire to faithfully discharge my duty.

Very respectfully,

W. B. FORMAN,

Physician in Charge State Lunatic Asylum.

REPORT OF SURGEON OF CONVICT CAMPS.

LIVE OAK, FLORIDA, Nov. 30, 1878.

GEN. J. J. DICKISON, *Tallahassee, Florida:*

I have the honor now to make my fourth quarterly report, which includes my annual statistics of the sanitary condition of convicts in charge of General H. A. Wyse near Live Oak, Florida. The past year, with its meteorological changes and sudden transits from heat to cold, had not passed away without unfavorable results to those suffering from chronic diseases. The mortuary account given in former reports, compared with this, will show conclusively and satisfactorily that the largest per cent. of deaths resulted not from malarial influences dependent upon locality, but from chronic diseases. These diseases, some of them were of long standing while others of more recent formation had been intensified by long incarceration perhaps before entering the Penitentiary. My experience for the last eighteen months as Physician in the Surgical department for the convicts convinces me that prisoners suffering from certain classes of chronic diseases cannot stand prison life long especially when the diseases are augmented and intensified by the gloomy prospect of years of toil and labor in the penitentiary. My humble opinion is that the Legislature of our State ought, in justice to those who have control of the convicts and in the vindication of a human government, to make provision by the appointment of two examining physicians, that they may place or represent before the Pardoning Board such prisoners that are suffering from chronic diseases and cannot stand prison life long. This would

check, in my estimation, to a great extent the unpleasant aspersions that arise and rest so unjustly on the government and the keepers of the Penitentiary.

The present condition and health of the convicts is flattering. They are well fed and clothed, and the stockade in which they sleep is kept clean and without stinck. The number on inspection are 64 and three of that number are unable to work and are slowly convalescing. In concluding this report I must say that their present condition is flattering and speaks well for their managers.

Three deaths have occurred during this quarter, of which I report as follows:

October 4, 1878, Clow died—Dropsy of the Heart.

October 11, 1878, Freeman died—Acute Pneumonia. *Remarks.*—When Freeman entered penitentiary he suffered severely from chronic gastritis, and was very weak when he took pneumonia, and died in a few hours from the time he took his disease.

October 19, 1878, Bill Allen died—Chronic Dysentary. *Remarks.*—Bill Allen suffered from secondary syphilis, which complicated his disease, and which caused his disease to prove fatal.

Before closing this report, and in justification to General H. A. Wyse the keeper of the prisoners, I must revert to prisoners received from Lake Eustis, on the 10th of August, 1877, which accounts for the increase in mortality of this annual report. The number received if my memory be correct, was about 27, and 19 of that number were sick with chronic dysentary, some of them complicated with typhoid fever. Two of this number were in a moribund condition, and were interred two or three days after their arrival. Six more lingered for a short while under the best treatment and attention that could be afforded in the stockade, and finally fell a prey to the ravages of malarial influences. Others that apparently recuperated from the dysentary affections were left with constitutions badly wrecked and some of these died this last summer. Now it is apparent in my opinion, that if the State had not sent the prisoners to Lake Eustis the mortality at the stockade would not have exceeded 8 or 10.

Respectfully,

J. S. HANKINS, M. D.

Surgeon for Convicts.

STATISTICS.
